

FOR IMMEDIATE RELEASE

Announcing the acceptance into the Safety and Health Achievement Recognition Program (SHARP)

Naples, Fla. – August 13, 2008

The Huck Group has been accepted into the Safety and Health Achievement Recognition Program (SHARP). This program recognizes small employers who manage and implement a commendable safety and health management system. Acceptance into this nationwide program by the Occupational Safety and Health Administration (OSHA) is an achievement that clearly demonstrates The Huck Groups' commitment to the health and safety of its employees.

Michelle Carter, Vice President of Human Resources, said "I truly believe this program is successful because we involved our employees and management from the beginning. The Huck Group's safety program has been noticeably enhanced by creating awareness of OSHA standards as well as our internal policies and procedures. Our safety committee has observed a reduction in reportable incidents and equally important, a strengthening of working relationships."

This recognition program and process was initiated in 2005. A complete hazard identification survey was conducted by an outside consultant. As part of this process, The Huck Group implemented a comprehensive safety and health management system to ensure full compliance with OSHA's 1989 Safety and Health guidelines.

As The Huck Group continues to grow, they will lead the industry; strategically, responsibly, and safely.
